Hi, Søren.

Past few months, I have been actively looking for an appealing student position. I have been casually browsing through LinkedIn when the vacancy for Danske bank pop up. I checked the opening on your page, and I told myself, this might be it! I was getting more and more excited reading terms as research, interaction design, design sprints, agile, design thinking, wireframing, prototyping, HTML, CSS,... All of the tools and concepts I love to occupy myself with.

The opportunity of being a part of Danske bank is one of the reasons why I came to Copenhagen. I see that as a way of how I can develop my personality and skillset. A way of getting experience from a well-functioning organization. A way to help a company to become even better.

What makes me a good fit for this position? I am a student of the multimedia design program, therefore, I am knowledgeable both in the design and code world. What's more, I really do enjoy both of them. Besides my studies, I treat UI/UX as my hobby. I spend most of my time learning and practicing what I learned. Also, I am passionate about sharing my knowledge with others by creating content for my Instagram account [@designwithivan](#).

I am confident to say I can use my previous work experience (agency intern, web content editor, communication director, digital marketer) combined with my creativity, drive, curiosity, problem-solving mind, and passion for the work to help Danske Bank to grow the Products & Solutions team.

I encourage you to take a look at my portfolio leskoivan.com where you can learn a bit more about me. It's not fully developed, but I would like you to see at least a sneak-peak of my work.

I believe both you and I can benefit from our potential collaboration. Therefore, I would love to speak with you soon!

Best regards,

Ivan
