Hi, Dialogue One.

Past few months, I have been actively looking for an appealing student position. I received an email from my school (KEA) listing you as a company offering a student job for a multimedia designer. I checked the opening on your page, and I told myself, this might be it! International marketing agency, offering a challenge to become a part of the IT development team. A lovely presentation with Ingimar and Timea during career day at KEA confirmed all my assumptions and made my excitement even higher.

The opportunity of being a part of Dialogue one is one of the reasons why I came to Copenhagen. I see that as a way of how I can develop my personality and skillset. A way of getting an experience from a well-functioning company. A way to help a company to become even better.

What makes me a good fit for this position? I am a student of the multimedia design program, therefore, I have knowledge from both the design and code world. What's more, I really do enjoy both of them. Besides my studies, I treat web development and design as my hobby. I spend most of my time learning and practicing what I learned. Also, I am passionate about sharing my knowledge with others by creating content for my Instagram account @designwithivan.

I am confident to say, I can use my previous work experience (agency intern, web content editor, communication director, digital marketer) with a combination of my drive and passion for the work, to help Dialogue one to grow the IT team.

I encourage you to have an eye on my portfolio leskoivan.com where you can learn a bit more about me.

I believe both you and I can benefit from our potential collaboration, therefore, I would love to chat with you soon!
