Hi, Emil.

Past few months, I have been actively looking for an appealing internship position. I have been casually browsing through LinkedIn when the vacancy for Matter pops up. I checked the opening on your page, and I told myself, this might be it! I was getting more and more excited reading terms as digital, interaction design, research, best practices, UX, design library. All of the tools and concepts I love to occupy myself by.

The opportunity of being a part of an innovative start-up as Matter, is one of the reasons why I came to Copenhagen. I see that as a way of how I can develop my personality and skillset. A way of getting experience from a well-functioning, international organization. A way to help a company to become even better in what they do. However, my motivation for this position goes deeper than only to the “work” level. After research of what you do, I can claim that you acquired a new fan! I truly admire the idea of bringing awareness to the sustainability aspect of investments. deeper

What makes me a good fit for this position? I am a student of the multimedia design program; therefore, I am knowledgeable both in the design and code world. What’s more, I really do enjoy both of them. Besides my studies, I treat UI/UX as my hobby. I spend most of my time learning and practicing what I learned. Also, I am passionate about sharing my knowledge with others by creating content for my Instagram account @designwithivan.

I am confident to say I can use my previous work experience (agency intern, web content editor, communication director, digital marketer) combined with my traits (creativity, drive, curiosity, problem-solving mind, and passion for the work) to help Matter to grow the Products & Solutions team.

I encourage you to have a look at my portfolio leskoivan.com where you can learn a bit more about me. It’s not fully developed, but I would like you to see at least a sneak-peak of my work.

I believe both you and I can benefit from our potential collaboration. Therefore, I would love to speak with you soon!

Best regards,

Ivan
